Art Unit: 1793

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-5, drawn to a system of a calcium based cement powder material and an aqueous hydration liquid, where the material and/or liquid contains a water soluble phosphate or a phase that has the capacity to from a water soluble phosphate and where the components of the system exhibits the capacity during hydration to from apatite.

Group II, claims 6-18, drawn to a calcium based cement powdered material containing a water soluble phosphate or a phase that has the capacity to from a water soluble phosphate.

Group III, claims 19-27, drawn to an aqueous liquid comprising a water soluble phosphate or a phase that has the capacity to from a water soluble phosphate.

Group IV, claims 28-32, drawn to an implant material.

Group V, claims 33-38, drawn to a method of bonding using the system of claim 1.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claim 1 is either obvious over or anticipated by U.S. patent 5,525,148 since it teaches a system of a calcium based cement powder material and an aqueous hydration liquid, where the material and/or liquid contains a water soluble phosphate or a phase that has the capacity to from a water soluble phosphate and where the components of the system exhibits the capacity during hydration to from apatite. Accordingly the special technical feature linking the groups, which is the system of claim 1, does not provide a contribution over the prior art; an no single general inventive concept exists. Therefore, restriction is appropriate.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1793

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
